

HACKBERRY

MEDIUM SHADE

HEIGHT

40 - 70'

SPREAD

50'

SUNLIGHT

Full sun, meaning it should get at least six hours of direct, unfiltered sunlight each day

SOIL

Grows well in acidic, alkaline, loamy, moist, rich, sandy, well-drained, wet and clay soils. It has some tolerance for both flooding and drought

ATTRIBUTES

- While often forgotten by casual consumers, is commonly heralded by tree experts as "one tough tree"
- Found on a wide range of soils east of the Rockies from southern Canada to Florida, these trees thrive in a broad span of temperatures and on sites that vary from 14 to 60" of annual rainfall
- They can even stand up to strong winds and tolerate air pollution
- All of this hardiness adds up to a good landscape choice, particularly if you're looking for an energy-conserving shade tree that doesn't require watering
