

FRAGRANT SUMAC

FOOD BEARING

HEIGHT

3 - 8'

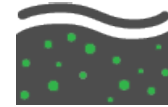

SPREAD

6 - 8'

SUNLIGHT

Indirect to Direct Sunlight.

SOIL

Fragrant Sumacs prefer acid, alkaline, dry, moist, well-drained, and sandy soils.

ATTRIBUTES

- Not so much of a tree, more of a smaller plant.
- U.S. native and deciduous shrub.
- Leaves are arranged in as 3 leaflets.
- Leaflets are egg-shaped and coarsely toothed.
- Small, yellow flowers, which lead to dark berries.
- Generally pest and disease free and drought tolerant.
